Welcome from WWW 2015 Poster Track Co-chairs

We are very happy to announce an exciting technical program for the poster session of the 24th International World Wide Web Conference (WWW 2015), held from May 18th to 22nd, 2015, in Florence, Italy.

For the poster program, we received a total of 220 submissions distributed over a number of technical areas, including data and web mining, machine learning, privacy and security. Each submission was reviewed by three experts — the total number of reviews was 647. The reviewing process was supported by 57 program committee members, and by 32 external reviewers and the entire process of review and decision taking was completed in less than a month from the last date of submission of the poster. The PC accepted 72 poster papers — roughly, one third of the number of the submissions. The accepted posters contain innovative ideas, which can initiate discussion at the poster session of the International World Wide Web conferences.

We received submissions from 39 countries, with a large number of submissions from USA, China, Italy and India among other countries.

We thank everybody who contributed to the technical program: the authors who submitted posters to WWW 2015, the PC members, and the external reviewers who contributed with their time and expertise. We also thank the program committee chair, Krishna Gummadi, for his support, and last year’s Chairs, Dongman Lee and Wolfgang Nejdi, who helped us with their advice and expertise. We are confident that the resulting program will be interesting and rewarding to both conference attendees and readers of the proceedings, and will lead to fruitful discussions and new ideas.

Flavio Chierichetti, Sapienza University of Rome, Italy
Niloy Ganguly, IIT Kharagpur, India
Alessandra Sala, Bell Laboratories, Ireland
